

Kindergarten Tree Project

August 2016

IOWA CITY
COMMUNITY
SCHOOL DISTRICT
FOUNDATION

Trees for the Kindergarten Tree Project are made possible through generous donations to the **ICCSF Foundation** from **Iowa City Landscaping** and **Project GREEN**.

(Thank you notes and photos are greatly appreciated. Forward these to Theresa Weeks - ICCSD Foundation for distribution.)

TREE SELECTION: It is recommended that you follow the Landscape Plan for your school. If a plan is not available, choose the planting site carefully. Input from Project Green or Iowa City Landscaping is available. Planting locations should be suitable to the tree species and take into consideration sight lines, other structures, play patterns, overhead and underground utilities, possible bee habitat, snow removal issues etc.

PRE-PLANTING INFO:
If tree will be kept in the classroom, place tree outside in a shady spot over the weekends and keep watered. Best if planted within 10 days of delivery. Height may be an issue on some varieties. Check the ceiling height in your classroom!
