Medicaid & CHIP Today: Enrollment Is at an All-Time High

- In March 2020, the Families First Coronavirus Response Act (FFCRA) established the continuous enrollment condition, which gave states extra federal Medicaid funding in exchange for maintaining enrollment for most individuals.

- As a result of this legislation and flexibilities adopted by states, Medicaid and Children’s Health Insurance Program (CHIP) enrollment has grown to a record high.

- Over 92 million individuals were enrolled in health coverage through Medicaid and CHIP as of December 2022.

- This represents an increase of over 21 million individuals, or nearly 31 percent, since February 2020.

Ending the COVID-19 Continuous Enrollment Condition

- Under the Consolidated Appropriations Act 2023 (CAA, 2023), enacted in December 2022, the FFCRA Medicaid continuous enrollment condition ended on March 31, 2023.
- States will resume normal operations, including restarting full Medicaid and CHIP eligibility renewals and terminations of coverage for individuals who are no longer eligible.
- States are now able to terminate Medicaid enrollment for individuals no longer eligible as of April 1, 2023.
- States will need to address a significant volume of pending renewals and other actions. This is likely to place a heavy burden on the state workforce and existing processes.
- When states resume full renewals, over 15 million people could lose their current Medicaid or CHIP coverage.¹ Many people will then be eligible for coverage through the Marketplace or other health coverage and need to transition.
- On January 30, 2023, the Biden-Harris Administration announced its intent to end the national emergency and PHE declarations related to the COVID-19 pandemic on May 11, 2023.

Resuming Normal Eligibility and Enrollment Operations: Expectations of States

- As the continuous enrollment condition ends, states must initiate eligibility renewals for the state’s entire Medicaid and CHIP population within 12 months and complete renewals within 14 months.
  - States may have begun this process in February, March, or April 2023 but may not have terminated eligibility for most individuals in Medicaid prior to April 1, 2023
- States have 4 months to resume timely processing of all applications, including those received after April 1, 2023.
- The Centers for Medicare & Medicaid Services (CMS) has been working closely with states for over a year to ensure that they are ready; that eligible enrollees retain coverage by renewing their Medicaid or CHIP; and that enrollees eligible for other sources of coverage, including through the Marketplace, smoothly transition.
- CMS has also issued an array of guidance and tools to support state processing of eligibility and enrollment actions, including new flexibilities and requirements for states.
The Renewal Process

- States must renew eligibility only once every 12 months for MAGI beneficiaries (most kids, adults, pregnant individuals, etc.) and at least once every 12 months for non-MAGI beneficiaries (e.g. aged, blind, disabled individuals).
- States must **begin the renewal process** by first attempting to redetermine eligibility based on reliable information available to the agency without requiring information from the individual (**ex parte renewal**, also known as auto renewal, passive renewal, or administrative renewal).
  - If available information is sufficient to determine continued eligibility, the state renews eligibility and sends a notice.
  - If available information is insufficient to determine continued eligibility, state sends a **renewal form** and requests additional information from the beneficiary.
    - For MAGI Medicaid, CHIP, and BHP, states must provide the individual at least 30 days to return the form. For Non-MAGI coverage, states must provide a reasonable time frame.
  - If the Medicaid agency determines that an individual is ineligible for Medicaid, the state determines potential eligibility for other coverage like the Marketplace, and transfers the individual’s account information **to the Marketplace** for a determination.
Preparing for the Work Ahead

Most states have been actively preparing for the end of the continuous enrollment condition for over a year. CMS has encouraged all states to:

• Develop an unwinding plan to prioritize and distribute renewals
• Obtain updated contact information to ensure that individuals receive information on redeterminations.
• Launch a robust outreach and communication plan for beneficiaries and stakeholders
• Engage community partners, health plans, and the provider community to amplify key messages and to provide assistance with renewals

However, there are anticipated challenges to overcome:

• Large volume of renewals for states to complete
• Workforce challenges and staffing shortages experienced by state Medicaid and CHIP agencies
• The long length of time since many enrollees have had to complete a renewal
• The likelihood of outdated mailing addresses and other contact information for enrollees

Multiple resources are available to support both states and partners in this effort.
Unwinding and Returning to Regular Operations after COVID–19

The expiration of the continuous coverage requirement authorized by the Families First Coronavirus Response Act (FFCRA) presents the single largest health coverage transition event since Medicaid and CHIP first were enacted in 1965. As a condition of receiving temporary 8% percentage point funding under the FFCRA, states were required to maintain enrollment of the coverage requirement engines, states will have up to 12 months to unwind.

Additionally, many other temporary authorities adopted by states, including Section 1115 waivers and disaster relief state plans, will need to plan for a return to regular operations across the additional tools and resources are released.

Full Information
Under what is known as the “continuous enrollment condition,” State Medicaid agencies have been unable to terminate enrollment for most individuals enrolled in Medicaid as of March 18, 2020, as a condition of receiving a temporary funding increase. The continuous enrollment condition ended on March 31, 2023, with states able to begin to terminate Medicaid enrollment for individuals no longer eligible for Medicaid as early as April 1, 2023. States will have up to 14 months to complete an eligibility renewal for all individuals in their programs, and thus Medicaid coverage losses will occur over time. This process is called the Medicaid continuous enrollment condition unwinding. Many consumers who lose Medicaid coverage will be eligible for affordable Marketplace plans.

Medicaid Continuous Enrollment Unwinding Overview:
- The earliest date states can terminate Medicaid coverage for consumers is April 1, 2023. **Consumers who lose Medicaid or CHIP coverage between March 31, 2023, and July 31, 2024, are eligible for a Medicaid continuous enrollment condition unwinding Special Enrollment Period (SEP).** Marketplace-eligible consumers losing Medicaid or CHIP coverage can access the SEP by submitting or updating an application through HealthCare.gov, a certified partner that supports SEPs, or the Marketplace Call Center.
- Navigators and Enrollment Assistance Personnel (EAPs) will have the ability to directly contact impacted consumers in Federally-facilitated Marketplaces (FFMs) to help them understand available coverage options and find affordable coverage that meets their needs, if requested. EAPs are additional contracted assisters CMS is deploying in key locations across FFM states.
  - Consumers may receive a letter including information for an Assister Organization serving their community in advance of this Direct Assister-to-Consumer Outreach.
  - Consumer information will be securely shared with these Assister organizations so that Assistors can conduct this outreach.
- **You can find free, local help for Marketplace enrollment, ask questions, and talk about plan choices by visiting [https://www.healthcare.gov/find-assistance/](https://www.healthcare.gov/find-assistance/)**
