## Domain: Economics

**Study of production, distribution, and consumption of goods and services. The concept of scarcity is understood to mean that available resources are insufficient to satisfy the wants and needs of everyone. Economics is therefore founded upon the alternative use of available resources and the study of choices.**

### Standards

1. Understand the role of scarcity and economic trade-offs and how economic conditions impact people’s lives.
2. Understand the functions of economic institutions.
3. Understand how governments throughout the world influence economic behavior.
4. Understand factors that create patterns of interdependence in the world economy.
5. Understand that advancing technologies impact the global economy.
6. Understand how universal economic concepts present themselves in various types of economies throughout the world.
7. Understand the function of common financial instruments.

### Grade Learning Standards

#### 6th to 8th Grade Learning Standards

<table>
<thead>
<tr>
<th>What students will Know (facts and concepts), Understand (principles and generalizations), Do (actions/skills and strategies)</th>
<th>&quot;I Can&quot; Statements in student language</th>
<th>Evidence of student learning</th>
</tr>
</thead>
</table>
| Understand the role of scarcity and economic trade-offs and how economic conditions impact people’s lives.  
- Understand the cost and benefits of economic trade-offs and how scarcity of resources affects costs and benefits.  
- Understand economic trade-offs at different levels (personal, business, local government).  
- Understand the short term and long term impact of economic trade-offs on society. | This domain is not covered in the History Alive Ancient World materials. | |
| Understand the functions of economic institutions.  
- Understand the services that are available at banks and credit unions.  
- Understand the process of interests and payments for goods.  
- Understand the role banks play among savers, borrowers, and investors.  
- Understand the types of specialized economic institutions found in market economies (corporations, partnerships, cooperatives, labor unions, banks, and nonprofit organizations). | | |
| Understand how governments throughout the world influence economic behavior.  
- Understand goods and services that the government provides.  
- Understand the government's purpose in preventing monopolies.  
- Understand how taxes are used at the local, state, and national levels.  
- Understand revenues and expenditures in the federal budget.  
- Understand the concepts of balanced budget, budget deficit, budget surplus, and national debt.  
- Understand the role of the Federal Reserve on the economy.  
- Understand the process of filing personal tax returns. | | |
| Understand factors that create patterns of interdependence in the world economy.  
- Understand the impact of imported and exported goods and services in the local community.  
- Understand the concepts of free trade and trade barriers.  
- Understand trade barriers imposed by the United States from a historical perspective and the impact of those actions.  
- Understand the interdependence of America and other regions of the world in terms of imports and exports.  
- Understand balance of trade and trade deficits and their impact on the price of goods.  
- Understand that the increased interdependence of the world market causes economic conditions in one country to affect others. | | |
| Understand that advancing technologies impact the global economy.  
- Understand the evolution of technology over time.  
- Understand the role of technologies that interlock the global economy.  
- Understand the role of investment and government support in advancing technologies. | | |
**Understand how universal economic concepts present themselves in various types of economies throughout the world**

- Understand the different types of economies and universal economic concepts (supply and demand, production, consumption, labor, capital, etc.) and their influence on each other.
- Understand how the laws of supply and demand affect price and consumers' responses to prices.
- Understand how the change of price for one good or service can affect the price for other goods and services.
- Understand causes of inflation, deflation, and recessions and who gains or losses from them.
- Understand the relation between gross domestic products and standards of living among countries.
- Understand unemployment.
- Understand the role of profit in motivating entrepreneurs in starting new businesses.

**Understand the function of common financial instruments**

- Understand checking accounts.
- Understand that bank accounts, loans and other services vary from one bank to another.
## DOMAIN: Geography - study of the interaction between people and their environments. Geography therefore looks at the world through the concepts of location, place, human-environmental interaction, movement, and region.

### Standards

14. Understand the use of geographic tools to locate and analyze information about people, places, and environments
15. Understand geographic and human characteristics create culture and define regions
16. Understand how human factors and the distribution of resources affect the development of society and the movement of populations
17. Understand how physical processes and human actions modify the environment and how the environment affects humans

<table>

</tr>
</thead>
</table>
| **Understand the use of geographic tools to locate and analyze information about people, places, and environments.**  
- Understand the characteristics and purposes of geographic tools and representations of the earth such as maps, globes, graphs, charts, models, grid systems, aerial and other photographs, GIS, satellite-produced images and databases.  
- Understand mental maps of locales, regions and the world.  
- Understand geographic relationships such as population density and spatial distribution patterns.  
**Understand how geographic and human characteristics create culture and define regions.**  
- Understand human and physical characteristics of place.  
- Understand the concept of region.  
- Understand the physical environment affects life in different regions.  
- Understand communities reflect the cultural backgrounds of their inhabitants.  
- Understand patterns of cultural diffusion.  
**Understand how human factors and the distribution of resources affect the development of society and the movement of populations.**  
- Understand physical and cultural patterns and their interactions, such as land use, settlement patterns, cultural transmission of customs and ideas, and ecosystem changes.  
- Understand world patterns of resource distribution and utilization.  
- Understand the role of technology in resource acquisition and use, and its impact on the environment.  
- Understand the development and widespread use of alternative energy sources have an impact on societies.  
- Understand physical and human geographic factors have influenced major historic events and movements.  
**Understand how physical processes and human actions modify the environment and how the environment affects humans.**  
- Understand human systems develop in response to conditions in the physical environment.  
- Understand major processes that shape patterns in the physical environment.  
- Understand the environmental consequences of both the unintended and intended outcomes of major technological changes in human history.  
- Understand technology influences the human capacity to modify the physical environment.  
- Understand the environmental consequences of people changing the physical environment.  
- Understand ecosystems in terms of their characteristics and ability to withstand stress caused by physical events. | I can use multiple tools to locate and learn about people and places.  
I can list example of how the geography of a region affects the way people live.  
I can give examples of how the use of available resources helped shape the way people lived.  
I can give examples of how people and the environment affect each other. | Observations, daily work, informal and formal assessments from the following chapters.

**6: The Ancient World**

*Exploring Four Empires of Mesopotamia

*Geography and Early Settlement of Egypt

*Geography and Early Settlement of India

*Geography and Early Settlement of China

*Geography and Early Settlement of Greece

*Geography and Early Settlement of Rome
Standards
18. Understand historical patterns, periods of time and the relationships among these elements.
19. Understand how and why people create, maintain, or change systems of power, authority, and governance.
20. Understand the role of culture and cultural diffusion on the development and maintenance of societies.
21. Understand the role of individuals and groups within a society as promoters of change or the status quo.
22. Understand the effect of economic needs and wants on individual and group decisions.
23. Understand the effects of geographic factors on historical events.
24. Understand the role of innovation on the development and interaction of societies.
25. Understand cause and effect relationships and other historical thinking skills in order to interpret events and issues.

I Can Statements
I can explain how people create governments and why they change over time.
I can describe how cultures change because of the movement of people and ideas.
I can give examples of why people create governments and why they change over time.
I can give examples of how cultures change over time.
I can give examples of how cause and effect relationships and other historical thinking skills influence events and issues.

Evidence
Observations, daily work, informal and formal assessments from the following chapters.

6: The Ancient World
*From Hunters and Gathers to Farmers
*Exploring the Four Empires of Mesopotamia
*Geography and Early Settlement of Egypt
*Geography and Early Settlement of India
*Geography and Early Settlement of China
*Geography and Early Settlement of Greece
*Geography and Early Settlement of Rome
*Learning about World Religions - Judaism - Buddhism - Christianity - Hinduism

All chapters will have something that connects.
## DOMAIN: Political Science / Civics - study of power and authority through the examination of political processes, governmental institutions, and human behavior in a civil society. In this context the study of civics is understood to include the form and function of government. Civic literacy encompasses civics but also addresses the individual’s social and political participation.

### Standards
